"What is iJetColorFlow 2.0?"

iJetColorFlow 2.0 is Printware's latest and exclusive DFE-based RIP software and upgraded embedded tool that is exclusive to all Printware IJetColor 1175 models. It features substantial improvements in four categories: Print Quality, Job Management, Cost Estimation, and Color.   To learn more *(sign up* **www.ijetcolor.com/book-an-appointment***)*

Embedded PH Tool   FREE for all iJetColor 1175 Models

☑ **Print Quality Optimizer**   **New Release July 2025**

The Print Quality Optimizer allows operators to adjust die positioning and density. This tool makes it easy to keep printheads running with the best possible quality. Our technical team can provide an upgrade in 10-15 minutes with a TeamViewer session

See technical overview at: **https://my1175p.ijetcolorwizard.com/categories/31937-the-pq-optimizer**

iJetColorFlow 2.0 New DFE and Color Tools   **$990** or **$490** with *iJetAdvantage*™

FREE to all 2025 Model Users

☑ **Improved Job Management**
   - ☑ New Job Default Settings
   - ☑ Editable Job Table with Sorting (Date & Time, Pages Printed, Job Number)
   - ☑ Even and Odd Pages Only Option
   - ☑ Reverse Order Checkbox
   - ☑ Length-based Scaling

☑ **New Cost Calculator**
   - ☑ Shows All Jobs since DFE Install ☑ Exportable to CSV File

☑ **iJetColor 2.0 True Color Profile**
   - ☑ The iJetColor 2.0 Color Profile provides the most accurate color fidelity. Thanks to True Color Technology, the printhead can now print direct CMYK pure ink colors adding to our existing PMS color profiles for perfect brand color matching.
